

MICHIGAN GREEN SCHOOLS PROGRAM 2007-08

The state of Michigan now has an official Michigan Green School Law, which encourages all public and private schools to participate in easy to administer energy-saving and environmental activities in a suggested plan with 24 choices. Any school that achieves 10 of these points in an academic year will receive an official Michigan Green School Designation. Qualifying schools will receive an official Michigan Green School flag and large handsome certificate to proudly display as you continue to work to save taxpayer dollars and protect Michigan's precious natural resources.

5 EASY STEPS

1. Your school will be supplied with free energy-saving and educational activity ideas.
2. Your school should designate a coordinator or a team of coordinators to help implement this easy, streamlined program.
3. The school coordinator should fill out the official application form. The school principal will then sign the application form verifying that at least 10 points have been successfully met.
4. The application form should be submitted to a county intermediate school district office or a county solid waste office. Respective names and addresses will be provided for you.
5. Your school coordinator will receive, in a timely fashion, the official Green School flag and certificate for the current academic year. This will ensure that students participating in the program will see the fruits of their efforts honored.
